

BINUS University

Academic Career: <i>Undergraduate / Master / Doctoral / International / BASE / BINUS Online*)</i>	Class Program: <i>Regular / Global Class*)</i>
☒ Mid Exam ☐ Compact Term Exam ☐ Final Exam ☐ Others Exam : _____	Term : Odd / Even / Compact *) Period (Only for BINUS Online): 1+2 *)
☒ Kemanggisan ☐ Senayan ☐ Semarang ☒ Alam Sutera ☐ Bandung ☒ Bekasi ☐ Malang	Academic Year : 2024 / 2025
Exam Type* : Onsite / Online	Faculty / Dept. : School of Computer Science
Day / Date** : Tuesday / November 12 th , 2024	Code - Course : COMP6696001 - Research Methodology in Computer Science COMP6696016 - Research Methodology in Computer Science COMP6696049 - Research Methodology in Computer Science
Time** : 17:00	Code - Lecturer : Team Teaching
Exam Specification*** : ☐ Open Book ☐ Open Notes ☐ Close Book ☐ Submit Project ☐ Open E-Book ☐ Oral Test	BULC (Only for BINUS Online) Class : All Classes
Equipment*** : ☐ Exam Booklet ☐ Laptop ☐ Drawing Paper – A3 ☐ Calculator ☐ Tablet ☐ Drawing Paper – A2 ☐ Dictionary ☐ Smartphone ☐ Notes	Student ID *** : Name *** : Signature *** :
*) Strikethrough the unnecessary items **) For Online Exam, this is the due date ***) Only for Onsite Exam	
Please insert the test paper into the exam booklet and submit both papers after the test. The penalty for CHEATING is DROP OUT!	

Learning Outcome for

☒ Mid Exam☐ Final Exam

Learning Outcomes:

LO 1: Describe the basics of writing research paper and the research lifecycle.

LO 2: Select the research topic, literature and writing strategies used in the project.

LO 3: Analyze the results from the research study.

I. Essay (10%) [Individual]

Submit the essay in one file with the filename format: Essay_NIM_Name.pdf

- [LO 1, 5 points]** Explain what **Citation** means and give **three reasons** why **Citation** is important.

Verified by,

Henry Lucky (D6660) and sent to Program on Oct 14, 2024

2. **[LO 1, 5 points]** One of the problems in the citation is "**Biased Citation**". Explain what "**Biased Citation**" means and give your suggestions to avoid it.

II. Project (90%) [Group]

Submit the project in two folders with filename format: Proposal_NIM_GroupName_Name & Draft_NIM_GroupName_Name. Each folder should contain 2 files in format DOCX and PDF.

Students must submit 2 (two) kinds of files for Project Scientific Paper Writing: **Research Proposal & Publication Draft**. Below are the details of the submission:

1. Create a **research proposal** (in English – see example) based on your **research topic** that has been proposed and **approved** by your lecturer in "Research Methodology in Computer Science" course with the following criteria:
 - a. **[LO 1, 15 points]** Create an **introduction section** related to the chosen topic. The introduction **at least** includes this information,
 - General knowledge about your research topic.
 - The urgency related to your research topic.
 - Information on what previous research has done.
 - The aim of your research.
 - b. **[LO 1, 20 points]** In Chapter 2 of the research proposal, please ensure each person includes at least 15 references. For a group of two, this should total 30 references (relevant to your research topic) from international publications with the following criteria,
 - The reference source is from journals or conferences.
 - The reference source must be published within the past five years.
 - The reference source within the same team must not be the same.

Create a table of references list using the table format below:

No	Source (Journal / Conference)	References (Author, Year, Title)	Research Purpose	Dataset/ Sample	Methods/ Model/Algorithm	Result
1						
2						
...						

*Columns can be added as needed for research information.

- c. **[LO 1, 10 points]** In Chapter 2 of the research proposal, a literature review should be developed based on the reference provided in answer number 1. This review should consist of at least three paragraphs, discussing the key aspects of the research topic. Make sure to cite all the references from the list you found before. Include a bibliography in IEEE style format according to the references used.
 - d. **[LO 1, 20 points]** In Chapter 3 of the research proposal, based on your understanding of the research topic and previous studies, propose your own methodology, model, algorithm, or solution for your current research. The method should be explained in technical terms. Use diagrams or graphs to support your answer (Make sure to create your own diagram and graphs by yourself).
2. Create a **publication draft** (in English – see example) based on your **research topic** that has been proposed and **approved** by your lecturer in "Research Methodology in Computer Science" course with the following criteria:

Verified by,

Henry Lucky (D6660) and sent to Program on Oct 14, 2024

- a. **[LO 2, LO 3, 20 points]** You can use IEEE template or any template according to the agreement with your lecturer. For IEEE: <https://www.ieee.org/conferences/publishing/templates.html>. You may summarize the research proposal that you have made.
- b. **[LO 2, LO 3, 5 points]** Make sure to fill correct the information:
- Title
 - Author and Affiliation
 - Research Keyword (Minimum 5 Keywords)
 - Introduction
 - Literature Review
 - Methodology
 - References

Submit the answer by combining the essay file and two project folders into 1 ZIP with filename format NIM_Name.ZIP.
