Soal GSLC Session 4

Silahkan selesaikan soal berikut dan Screenshotlah hasil yang diperoleh.

Problem 1

During the exam you accidentally saved your results in the wrong location.

The output requirement for the question was to place the result data in the hdfs directory:

`/user/vb_student/problems/section03/problem03/solution/`

Instead you saved the results files in the location:

`/user/vb_student/problems/section03/problem03/data/`

Move your results files from the data directory to the appropriate directory.

Note: Take care not to delete or misplace the data file that's in the data directory!

Solution :

- Use the ls function to find the filepath of the file that needs to be moved.

```
verulam-blue ~ hdfs dfs -ls /user/vb_student/problems/section03/problem03/d
ata/
Found 5 items
-rw-r--r--  1 verulam-blue supergroup      0 2021-06-01 12:11 /user/vb_st

```

- Use the mv function to move the file

```

verulam-blue ~ hdfs dfs -mv /user/vb_student/problems/section03/problem03/d
ata/ /user/vb_student/problems/section03/problem03/solution/
verulam-blue ~ hdfs dfs -ls /user/vb_student/problems/section03/problem03/s
olution/

udent/problems/section03/problem03/solution/data

```

Problem 2

Copy all the data files from the "data" directory on the local file system to the HDFS directory "data".

The directory path of the "data" directory on the local files system is shown below:

```
/home/verulam-blue/working/section_03/problem07/data/
```

The directory path of the "data" directory on HDFS is shown below:

```
/user/vb_student/problems/section03/problem07/data/
```

Use the put function to put the file from local to hdfs

```

verulam-blue ~ hdfs dfs -put /home/verulam-blue/working/section_03/problem0
7/data/ /user/vb_student/problems/section03/problem07/data/
verulam-blue ~ hdfs dfs -ls /user/vb_student/problems/section03/problem07/d
ata/
